PROFESSIONAL SUMMARY

Computer Science student with hands-on experience in full-stack development, generative AI, and software engineering. Proficient in MERN stack, Python, and AI tools for building scalable applications, REST APIs, and intelligent systems. Seeking Software Developer, Full Stack Developer, or AI/Generative AI internships to apply skills in prompt engineering, machine learning, and agile development.

TECHNICAL SKILLS

Programming Languages	**Python, Java, JavaScript**
Frontend	**React.js, HTML, CSS, Tailwind CSS**
Backend	**Node.js, Express.js**
Databases	**MongoDB, MySQL**
Tools	**Git, GitHub, REST APIs**
Generative AI	**Prompt Engineering, Generative AI Basics, AI-assisted Development**

INTERNSHIP EXPERIENCE

Full Stack Developer Intern — **Agnivra**
- Developed MERN stack applications using React, Node.js, Express, and MongoDB
- Built REST APIs and integrated backend services for efficient data handling
- Implemented responsive UI components with Tailwind CSS to enhance user experience

Frontend Developer Intern — **Code Alpha**
- Designed and built responsive React user interfaces for web applications
- Optimized UI performance and improved accessibility features
- Integrated frontend with backend APIs to ensure seamless data flow

PROJECTS

AmbulanceConnect AI – Emergency Ambulance Dispatch System — **React.js, Node.js, Express, Google Maps API**
- Developed full-stack AI-powered emergency dispatch system for real-time ambulance coordination
- Implemented nearest ambulance optimization using Haversine distance formula
- Integrated Google Maps API for tracking and route visualization
- Built accident risk prediction logic and heatmap visualization for accident-prone zones
- Created severity-based priority dispatch system to improve emergency response efficiency

MERN E-Commerce Platform – Green Roots Mart — **MongoDB, Express.js, React.js, Node.js**
- Engineered full-stack e-commerce platform with product catalog and shopping cart functionality
- Designed responsive user interface using React and Tailwind CSS
- Implemented secure user authentication and payment integration for seamless transactions

AI Study Assistant Chatbot — **Python, Generative AI**
- Built intelligent chatbot to answer programming questions using prompt engineering
- Developed natural language processing features for accurate, context-aware responses
- Integrated generative AI models to provide personalized study assistance

AI Resume & Prompt Generator — **Python, Generative AI**
- Created tool to generate ATS-optimized resumes and structured prompts
- Utilized AI-assisted development for automated content generation and formatting
- Optimized output for software developer and AI internship applications

EDUCATION

2026-Present **B.Tech in Computer Science**
DVR & Dr HS MIC College of Technology
Pursing 3rd year BTech
SGPA-9.90
CGPA-8.54

2021-2023 **Intermediate**
Score: 90%

2020-2021 **Secondary School**
Score: 96%

CERTIFICATIONS

2023-2026 **Important**
-Data Science using Python – NPTEL
- Internet of Things – NPTEL
- MERN Full Stack Development – Agnivra

ADDITIONAL ACTIVITIES

Active participant in coding competitions, solving algorithmic challenges on platforms like LeetCode and HackerRank
Build and maintain open-source projects on GitHub, contributing to collaborative software development

2023-2026 **Coding and Technical Workshops**
Active participant in coding competitions and technical workshops, showcasing a passion for continuous learning

TitleSports and Team Activities
Engaged in sports and team activities at the college level, fostering teamwork and collaboration
